MAHMOUD KHAROUF

BACKEND ENGINEER

Tulkarm, Baqa Ash-Sharqiyya | 0566400296 | KharoufMahmoud@gmail.com
linkedin.com/in/mahmoudkharouf | github.com/KhMahmoud | **khmahmoud.com**

Computer Science graduate and backend engineer specializing in multi-tenant, service-layered web applications with Python and Django. I design clean data models, enforce tenant isolation and role-based access, and translate business rules into reliable REST APIs. A prior career in land surveying grounds my work in data precision and disciplined technical documentation.

TECHNICAL SKILLS

- Python · Django · Django REST Framework
- REST API Design · SQLite · Git / GitHub · PostgreSQL (learning)
- Multi-tenant architecture · RBAC · JWT authentication · Service-layer design

KEY PROJECT

Atlas ERP — Multi-Tenant Business Management System **Graduation Project | 2026**

Django REST Framework · React 19 · SQLite · JWT

- Led backend development for a multi-tenant ERP serving isolated organizations, each seeing only its own data.
- Built 5 core business modules (inventory, billing, purchasing, CRM, dashboards) on a layered architecture: thin views, validating serializers, and a transactional service layer holding the business logic.
- Enforced strict tenant isolation through a scoped-queryset pattern and organization middleware, with role-based access control (admin / manager / staff) governing every endpoint.
- Modeled real accounting flows — invoices, payments, stock movements — with derived stock never stored, and org-scoped sequence numbering for all records.

PROFESSIONAL EXPERIENCE

LAND SURVEYOR | Ahmad Al-Ammer & Thafer Al-Qaisi, Tulkarm **2019 – 2022**

- Processed and validated large geospatial datasets (GPS/GNSS), and authored technical compliance reports for infrastructure and cadastral projects — the data-precision discipline I now bring to backend engineering.

EDUCATION

B.Sc. in Computer Science | Al-Quds Open University **2022 – 2026**

Diploma in Land Surveying | Ramallah Training Center **2017 – 2019**

ADDITIONAL INFORMATION

- **Languages:** English (Professional Working Proficiency), Native Arabic.
